— THE PERSONAL PORTFOLIO OF

Jacob Windsor.

A curious mind.
A creative streak.

Exploring computer science, building for the web, and finding my own rhythm along the way.

01 / ABOUT ME

A little logic.
A lot of imagination.

Hi, I'm Jacob. I'm interested in what happens when technical thinking meets creativity.

I'm developing my skills in computer science and web development, turning what I learn into projects I can keep improving. I enjoy breaking down a problem, experimenting with ideas, and seeing something come to life on screen.

Outside of coding, I play guitar and piano and write music. Whether I'm working through a programming challenge or a new song, I like the process of making something my own.

Jacob Windsor — always learning.

02 / MY TOOLKIT

What I'm working with.

Foundations I'm building on,
one project at a time.

DESIGN → DEVELOP → REFINE

CURRENT PROJECT

My personal portfolio

A home for my work and interests, built with semantic HTML, responsive CSS, and a little JavaScript. Navy, maroon, and gold give it a Texas State-inspired touch.

THE / IN DEVELOPMENT

GAME IN DEVELOPMENT

The History of Everything

I'm developing **The History of Everything (THE)** with an ambitious vision: to create a game so engaging and enduring that it becomes the one players always return to—a lasting destination for discovery and play.

THE NEXT CHAPTER

IDEA / NOT YET BUILT

A useful everyday tool

I'm interested in building apps that help people solve everyday problems. This space will grow as I turn those ideas into working projects.

04 / BEYOND THE KEYBOARD

[Skip to content](#)

Same curiosity.
Different strings.

Music is the other side of my creative life. Guitar, piano, and songwriting give me another way to experiment, tell stories, and connect with people.

I also teach piano, guitar, vocals, and drums, sharing my love of music with others.

Inspired by acoustic pop, blues, and a great melody.

JW.
